## **PART 2 of the Hugamanannygoat and PLR&F Hash Trilogy**

### **Pre-Hash**

Having underestimated the time to get to the run site having first called in at the PTT station on Phet Kasem Road close to The Energy to get the only supply of E85 this side of Cha-am and awaiting the very slow goods train at the rail crossing on Springfield Road I eventually arrived at the junction on Springfield Road at 16:10 to be confronted by Bushwhacker blocking the road. This was due to the Hare putting up the HHH sign. It was therefore a slower journey from this point to the start as the Hare stopped to put up more HHH signs on route. Upon arrival at the site there were a few early arrivals who obviously remembered how to get there from their last visit to the same site on the 5<sup>th</sup> July. The beer truck arrived together with several other hashers and as the pack numbers swelled I collected the cash and sought the assistance of Legs to issue the awaited new H2H3 Stash. However this turned out to be a bit of a bun fight and eventually the Stash was put back into Tinks's car and a more orderly issue of stash followed. The numbers eventually swelled to 53 with Davey Delayed living up to his name and arriving late.

I called the pre-run circle and introduced the pack to the Hares for the day. However Hugmanannygoat was now out on trail to ensure that the paper was there and to redirect any short cutters who had other ideas on their mind. PLR&F proceeded to advise the pack of the various problems that may be encountered on trial. Having completed his briefing the pack were directed onto the trail.

### **The Trail**

The Pack set out shortly after 17:00 and the usual FRB's raced away only to be caught out by a false trail at the first check. The next check was broken fairly quickly but at the third Bushwhacker found yet another false trail. The trail then wandered through scenic open areas to the run/walk split at around 1.5 k into the trail. At this point a small number of hard core hashers set off on the runners trail including me sweeping up at the back as usual together with Hare PLR&F. Having heard that there was another false trail I took this onboard and when seeing the FRB's wandering around ahead of a check I beared right with the nod from the Hare and ended up on trail and now being the FRB. The checks were broken reasonably quickly and when we got to an open road it was going to be an obvious right turn. However the devious Hares opted to continue on into the trees to a check on another path. Still being the lead I opted right and found paper and as expected ended up on the main track only to see the tail end runners opting to take the short cut, with Brambles leading. The trail continued until the merge with the Walkers trail. The runner's loop having been around 2.6 k and taking 25+ minutes to complete it was unlikely we were going to see any tail end walkers. Sodomy broke through to become the front runner and Bushwhacker passed me for the umpteenth time. After a rather lengthy stretch of trail through trees we came across a check in more open ground and a winging Sodomy mooning that he had been wandering around for more than 10 minutes and that the walkers had broken the trail and laid paper in the wrong direction. However now supported with around 15 or so hashers fanning out in several directions and following many paths paper was finally found and the pack headed on towards home. On the way several hashers missed paper and were being chastised by Hare Hugmanannygoat for going off trail and told to go back and get on trail. This was duly done and eventually the blue and yellow water tower came into view and it was on home to the waiting cold refreshments and some snacks prepared by hare PLR&F.
